Policy Statement

The guidelines recommended for conducting safe, timely, efficient and successful Work Conditioning Programs can be described by the following components:

a. Referral criteria
b. Admission criteria
c. Treatment standards
d. Discharge criteria

Referral Criteria
1. A compensable injury has been appropriately reported
2. There is a recommendation for work conditioning by a physician, case manager, court order, or other appropriate parties
3. Physician's prescription

Admission Criteria
1. The client demonstrates potential to benefit from such a program i.e., has completed rehabilitative care.
2. The client's current levels of functioning interfere with his/her ability to carry out specific tasks required in the work place.
3. The client may or may not have already transitioned to part-time or modified employment and requires such a program to further enhance current tolerance to work requirements.
4. The client does not display attitudinal, behavioral issues, psychosocial barriers, or significant chronic pain behaviors that would interfere with returning to work, and therefore, does not require psychological services.
5. Medical, psychological, or other conditions do not prohibit their participation in the program.
6. The client may or may not require continued modalities for symptom management.
7. Informed consent for treatment has been obtained.
Utilization Management Policy

Treatment Standards

a. Evaluation by a physician, physical or occupational therapist. This treatment provider may include, but is not limited to the physical and/or occupational therapists, physical and/or occupational therapist assistants, and other licensed providers qualified by scope of practice.

b. Quantitative measures of the client's impairments and dysfunction.

c. Rehabilitation goals with a focus on improved function and return to work.

d. Procedures for timely integration of the evaluation information to formulate an effective treatment plan. Documentation to be completed within 5-7 working days.

e. Record review and maintenance, to include daily documentation of the client's therapeutic activities and response to treatment.

f. Therapeutic activities address the following:
   • Mobility and flexibility
   • Strength and stabilization
   • Cardiovascular and muscular endurance
   • Safety and ergonomics
   • Injury prevention and wellness education
   • Tolerance to work requirements

g. Periodic re-evaluation and documentation of progress, outcomes, and appropriateness to continue.

h. Typical frequency and duration is 2 to 4 hours per day, 2 to 5 days per week, for 2 to 6 weeks dependant upon the client's needs.

Discharge Criteria

1. Accomplishment of established goals
2. Return to work readiness
3. Plateau in physical and/or functional progress/maximum medical improvement
4. Change in medical condition
5. Non compliance with program policies and/or activities. The client is allowed no more than 3 unexcused absences; 5 days of tardiness are equivalent to 1 absence

Coverage

Participation in Work Conditioning is limited to a maximum of one program per physician referral. However, there may be cases that warrant a repeat work hardening programs. These cases will be reviewed individually based upon individual client/patient objective data compared to standardized norms.

A Work Conditioning Program shall be reimbursed for up to 4 hours per day for up to 5 days per week for a maximum of 6 weeks.

Purpose

This process document describes Optum* by OptumHealth Care Solutions, LLC methodology and requirements for the appropriate and safe application of Work Conditioning Programs CPT codes 97545 and 97546.

*Optum is a brand used by OptumHealth Care Solutions, LLC and its affiliates
Scope

This document was developed primarily for Workers’ Compensation products, where care management is being rendered for individuals who have musculoskeletal conditions that are medically stable, and demonstrate residual limitation of function and disability.

Definitions

*Work Conditioning* is an individualized and structured rehabilitation program organized to improve function, and quality of life with a goal of return to work.

Description

Work conditioning programs primarily consist of physical conditioning, injury prevention, and wellness education designed to return the client to his/her previous employment. Work conditioning provides coordinated and outcomes-oriented services in an outpatient setting.

Background

**Purpose**

Work conditioning programs are considered to be less comprehensive and structured than work hardening. Whereas work hardening programs utilize real or simulated work activities, work conditioning focuses on physical conditioning and functional activities related to work. Work conditioning programs can be supervised by a single provider and typically operate on a 2-4 hour/day basis, two-five days a week for up to six weeks.

**Patient Selection Criteria**

The Work Conditioning client has received acute rehabilitation services and is expected to return to his/her previous employment; however, is unable to do so as a result of general deconditioning since the injury and his/her limited endurance or tolerance to work requirements. Once such a program is established the client is expected to become independent with safe performance of program activities.

Patient selection for work conditioning differs from criteria for work hardening in several aspects. Work conditioning is most suitable for individuals who, following conservative rehabilitation, exhibit functional and physical impairments that interfere with return to work, and do NOT demonstrate attitudinal, behavioral and/or significant chronic pain that also interfere with return to work. These individuals require a comprehensive care approach that promotes relative independence.

Work conditioning is a recommended treatment strategy only for injuries to the low back, neck/upper back, knee/leg, shoulder and forearm/wrist/hand. Work conditioning is not listed as a evidenced-based treatment strategy for ankle/foot, burns, carpal tunnel syndrome, elbow, eye, head trauma, headaches, hernia, hip/pelvis, mental illness and chronic pain.
Provider Qualifications
The components of a work conditioning program shall be performed by licensed providers qualified by scope of practice.

Reporting Requirements
Written reports will include the following information:
   a. Patient demographics including work history
   b. Indication(s) for participation
   c. Specific interventions
   d. Outcomes/Discharge status
   e. Recommendations

Coding Information
Note: The Current Procedural Terminology (CPT) codes listed in this policy may not be all inclusive and are for reference purposes only. The listing of a service code in this policy does not imply that the service described by the code is a covered or non-covered health service. Coverage is determined by the member’s benefit document.
