Frequently Asked Questions

Q: Where may I obtain additional information about the Clinical Support Program?
A: You may obtain additional information regarding the Clinical Support Program by accessing your:
- Plan Summary
- WebAssist, [www.myoptumhealthphysicalhealth.com](http://www.myoptumhealthphysicalhealth.com)
- Operations Manual
- Provider Service Representative for administrative information
- Support clinician for clinical information

Q: Who is my support clinician and how do I reach him/her to discuss clinical issues?
A: OptumHealth Care Solutions, LLC (OptumHealth) has clinicians located throughout the United States. Each state has a designated support clinician(s). A provider service representative may connect you with your assigned support clinician. Additionally, your support clinician's name is listed on the Patient Summary Response you receive when you submit a Patient Summary Form.

Q: I hear about the Web site/“my Web site”/WebAssist repeatedly. How do I access this site and why should I use this site?
A: The provider Web site, WebAssist, provides a wealth of information. You may access WebAssist by launching Internet Explorer on your browser, typing [www.myoptumhealthphysicalhealth.com](http://www.myoptumhealthphysicalhealth.com) into the URL, and entering your provider ID and Web site password. If you do not have a provider ID and password, you may contact a provider service representative who will provide you with one.
WebAssist offers a variety of useful tools and information including:
- Your provider profile
- A direct link for submission of Patient Summary Forms
- A link to view Patient Summary Form submission status
- A link to view claim submission form status
- A link to submit a claim
- Clinical resources to include tutorials, commonly used forms, newsletters, and policies

Q: I am frequently encouraged to use the “online format” for Patient Summary Form submissions. Why should I submit a Patient Summary Form online rather than submit it via fax?
A: One of the benefits of electronic Patient Summary Form filing is that the system will not accept the Patient Summary Form unless it is filled in completely. This will immediately reduce errors and process delays. Fax submission of incomplete Patient Summary Forms can increase processing time. Another benefit to submitting a Patient Summary Form online is that once the Patient Summary Form is successfully submitted you will receive a confirmation number. You may print out the confirmation page or copy down the confirmation number. Receipt of the confirmation number lets you know that your
Patient Summary Form has been received. When you submit your Patient Summary Form online, you have the added ability to view the status of your online submission.

Q: How do I know if a patient requires a clinical submission? When I called UnitedHealthcare the representative said no preauthorization was required.

A: After verifying the member’s benefits with UnitedHealthcare, you must also check the group number with OptumHealth to determine clinical submission requirements. Please call the Quick Group Check line at 888-329-5182 or log onto www.myoptumhealthphysicalhealth.com and use the Quick Group Check utility located in the Tools & Resources section.

Q: Why is my Patient Summary Form submission returned as “late”?

A: A Patient Summary Form submission is considered “late” if it is received later than the timely filing requirements. These requirements may vary by state and health plan. Please refer to the Provider Operations Manual and/or your participating provider agreement for specific guidelines.

Q: I am treating a patient with two different conditions. When I submit a second Patient Summary Form for the second condition, the first Patient Summary Response is changed to reflect inclusion of the second condition. Why can’t I have a different Patient Summary Response for each condition treated?

A: OptumHealth expects providers to treat all conditions identified judiciously and simultaneously. If treatment begins with one condition within a given timeframe and OptumHealth receives a new Patient Summary Form with a new condition identified, the end date on the initial submission response will be shortened to allow for the start date of the current Patient Summary Form submission.

Q: Why does my Patient Summary Response confirmation number contain letters in addition to the usual number-only confirmation?

A: A Patient Summary Response number that contains letters as a part of the confirmation number indicates that a change in the original Patient Summary Response has occurred. Examples of when you may see this are as follows:

- Change/update in conditions treated
- Change/update in visit value
- Change/update in visit end date value

Q: OptumHealth does not require that I record functional outcome measures with each Patient Summary Form submission. Why should I implement functional outcome assessment in my clinic and why should I submit functional outcome scores on the Patient Summary Form?

A: Using functional outcome tools in your clinic provides you with ongoing assessment of patient progress with the established treatment plan. Sharing these outcomes with your patient is an opportunity for first-hand continuous feedback. This also provides the strongest documentation for the ongoing need for skilled care. All outcome assessment tools, templates, scoring how-to’s, and interpretative education materials are available on www.myoptumhealthphysicalhealth.com.

Q: Should I review the “Patient Completes This Section” with my patients?

A: Absolutely. When you review this information with your patients, you improve patient/practitioner communication, goal setting, and barrier recognition. The increase in communication can yield a more positive treatment outcome.

Q: Why should I include information about my patient’s surgical procedure and the date of
surgical procedure on the Patient Summary Form?
A: Your designated support clinician reviews all relevant information in order to apply an appropriate visit/date milestone value to the Patient Summary Response. Surgical procedure and date of surgical procedure information are important components of a patient’s health record. Recording these applicable components ensures that your support clinician has a full appreciation of the case and all the complexities that may exist due to surgical intervention.

Q: I have a contract reimbursement question. Where should I direct my question/concern?
A: Contract/reimbursement concerns may be addressed in writing to:

OptumHealth Network Management
PO Box 59329
Minneapolis, MN 55459-9745
